Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Michael Turner, Performance Director at a National Olympic Committee	understand which countries and regions win the most medals, how medals have changed across the Games from 1992 to 2026, and where our team stands	medal tables, athlete numbers and efficiency data are scattered, so I cannot see global trends and top performers in one place	there is no interactive dashboard that brings medal totals, athlete participation and efficiency together for all Games	overwhelmed and uncertain when planning team size and funding for the next Games
PS-2	Sofia Martinez, Sports Funding Officer at a national sports ministry	compare medal efficiency, sports investment level and host-nation advantage across regions to decide where funding gives the best return	I cannot quickly see whether higher investment leads to more medals, or how efficiency differs by region and host country	investment, region and host data sit in separate datasets, and manual comparison is slow and error-prone	frustrated and worried that budget decisions rest on incomplete evidence
PS-3	Dr. Aisha Khan, Sports Data Analyst at a university research centre	analyse athlete performance by sport category and season, and link it to country medal results over 18 Games	I cannot see how sport categories, medals per athlete and regional efficiency relate to each other	athlete, medal and Games data are not presented together in a comparable, visual and filterable form	concerned and held back, because research findings need clear evidence I cannot easily produce
